

Get the facts on the vax

Book your COVID-19 vaccination

TRUTH

The vaccines are safe

Many people around the world worked together to create the COVID-19 vaccine, sharing money and scientists to get it done in just months, without missing any steps. Vaccines are only allowed in Australia after being tested and found to be safe and effective. All vaccines continue to be quality tested and monitored for safety.

The COVID-19 vaccines do not contain live virus and cannot give you COVID-19

The vaccines pretend to be the real virus and teach your body how to defend itself. This will help stop you from getting really sick and going to hospital or even dying.

×

MYTH

×

The vaccine was approved too quickly to be safe.

×

The vaccine could give you COVID-19.

TRUTH

MYTH

We do know every ingredient that is in the vaccines

The vaccines are mostly water, with salt, sugar and fats. There is no graphene oxide, gluten, egg, wheat, bee venom, latex or animal products in the vaccines.

The vaccines are providing good protection against the new strains

Two doses of the Pfizer or AstraZeneca vaccine are very effective in protecting people from becoming seriously ill with the new variants, including the Delta strain.

COVID-19 vaccines can't change your DNA

The vaccines deliver instructions to your cells to build protection (immunity) against the coronavirus. This does not happen in the part of your cells where your DNA is.

You can choose to be vaccinated

You can make your own decision. Make sure you ask trusted people to help you find facts. False news can be very misleading and dangerous.

We don't know what's in these vaccines.

There's no point in getting vaccinated due to the new COVID strains.

The vaccine will change my DNA.

Doctors want to force people to be vaccinated.
